

Jesse Martin

Senior Embedded Software Engineer

Detroit, MI | (123) 456-7890 | jesse.martin@email.com | LinkedIn

Senior Embedded Software Engineer with 13 years of experience developing firmware and embedded systems for automotive and IoT devices. Skilled in C, C++, real-time operating systems (RTOS), and hardware-software integration. Known for delivering reliable systems that meet safety and compliance standards.

PROFESSIONAL EXPERIENCE

Senior Embedded Engineer | September 2015 – Present
AutoTech Systems | Detroit, MI

- Designed embedded software for advanced driver-assistance systems (ADAS), improving safety scores by 25% across product lines
- Optimized firmware for IoT devices, extending battery life by 18% and reducing power consumption
- Led debugging initiatives that resolved hardware-software integration issues, cutting failure rates by 20%

Embedded Software Engineer | June 2010 – September 2015
Brightline Robotics | Ann Arbor, MI

- Built firmware for robotic control systems, enabling precise navigation with 95% accuracy
- Developed real-time systems supporting 24/7 industrial operations, reducing downtime by 30%
- Partnered with cross-functional teams to achieve ISO 26262 safety compliance

KEY SKILLS

- C and C++ programming
- IoT device optimization
- Safety compliance (ISO 26262)
- Embedded firmware design
- Real-time operating systems

EDUCATION

Bachelor of Science in Electrical Engineering
University of Michigan May 2010

CERTIFICATIONS

- Certified Embedded Systems Engineer | 2012
- Automotive SPICE Proficiency Certification | 2014
