DETAILS

Gender: Male

SKILLS

- Cybersecurity fundamentals
- Ethical hacking basics
- Python
- C / C++
- Web development
- Databases (MongoDB)
- APIs & integration
- Team collaboration

Niranga Nayanajith

Undergraduate Student | Cybersecurity Enthusiast | Software Developer

PROFILE

I am an undergraduate student with a deep passion for cybersecurity, artificial intelligence, and software development. I enjoy solving problems, learning new technologies, and building practical solutions. I continuously explore areas such as full-stack development, backend/frontend engineering, and Windows application development, while strengthening my core programming and security knowledge.

EDUCATION

BSc (Hons) in Computing and Information Systems — Sabaragamuwa University of Sri Lanka

Jan 2024 – Dec 2028

CERTIFICATES

- Ethical Hacking - Mobile Platforms and Network Architecture (Nov 2024)
- Introduction to Cyber Crime (Nov 2024)
- Introduction to Cyber Security (Nov 2024)
- Introduction to Ethical Hacking (Nov 2024)
- MoraXtreme Hackerrthon (Nov 2024)
- Introduction to Programming Using Python (Aug 2024)
- Responsive Web Design (Aug 2024)
- Basic in Python (Jun 2024)
- C Language Gold Level
- Introduction to Programming

PROJECTS

WikiZero

An independent technology news and insights platform. Built to share updates, ideas, and analysis with a well-organized reading experience.

Link: [WikiZero AI - Create Your Digital Twin](#)

Webifyme

A full-stack app to automate presentation creation. Uses AI content generation and slide structuring; includes authentication, dashboards, and collaborative sharing. Tech: Python (Flask), MongoDB, Gemini API, Unsplash API.

Link: [Webify.me](https://webify.me)

SiUnicode

Sinhala typing helper that converts simple English letters into Sinhala Unicode and legacy fonts in real time. Includes system-wide typing support and easy integration.

Link: [Singlish to Sinhala Converter](https://github.com/SiUnicode/Singlish-to-Sinhala-Converter)

Download:
